

REMARKS

Claims 2-5, 7-8, 10-14, 20-28, 35-38, 40-41, 43-47, 53-58, 68-71, 73-74, 76-80 and 86-88 were rejected under 35 U.S.C. § 102(a) as being anticipated by Anawave Websnake, version 1.23 (hereinafter "Websnake").

Independent claim 11 has been amended to include the features of claim 2. This amendment does not raise any new issues as it recast a dependent claim in independent form and is suitable for entry after final rejection. Websnake fails to teach all the elements of claim 11.

Claim 11 recites "sending an archive file containing the site map to the client computer in response to the single request; wherein the archive file includes a plurality of resources associated with the desired Web page, further comprising compressing the plurality of resources associated with the desired Web page into the archive file." Claim 11 states that the archive file that contains the site map includes compressed resources. Thus, in the method of claim 11, the client receives a compressed, archive file containing resources associated with the Web page. Claim 20 recites decompressing this archive file.

Websnake fails to teach compressing resources into an archive file before sending the archive file to the client. In analyzing claim 2, the Examiner cites to page 3 of Websnake which reads "Depending on which site you snake and how deep you go, the download files can take up a fair amount of space. If you're running out of room but don't want to lose your data, WebSnake's handy zip tools let you compress the content of an entire project to save valuable disk space." This section clearly indicates that the compressing in Websnake occurs after the resources are delivered to the client. In Websnake, the project delivered to the client is not compressed, but can be compressed using a zip tool at the client. This is contrary to claim 11, which states that the archive file sent to the client includes compressed resources. Thus, Websnake fails to teach all the elements of claim 11.

For the above reasons claim 11 is patentable over Websnake. Claims 3-5, 7, 8, 10, 12-14, 20-25 depend from claim 11 and are patentable over Websnake for at least the reasons advanced with reference to claim 11.

Claim 44 has been amended to include the features of claim 35. This amendment does not raise any new issues as it recast a dependent claim in independent form and is suitable for entry after final rejection. Claim 44 recites features similar to those discussed above with reference to claim 11 and is patentable over Websnake for at least the reasons advanced with reference to claim 11. Claims 36-38, 40, 41, 43, 45, 46, 47, 53-58 depend from claim 44 and are patentable over Websnake for at least the reasons advanced with reference to claim 44.

Claim 77 has been amended to include the features of claim 68. This amendment does not raise any new issues as it recast a dependent claim in independent form and is suitable for entry after final rejection. Claim 77 recites features similar to those discussed above with reference to claim 11 and is patentable over Websnake for at least the reasons advanced with reference to claim 11. Claims 69-71, 73, 74, 76, 78-80 depend from claim 77 and are patentable over Websnake for at least the reasons advanced with reference to claim 77.

In view of the foregoing remarks, Applicant submits that the above-identified application is now in condition for allowance. Accordingly, it is respectfully requested that this application be allowed and a Notice of Allowance be issued. If the Examiner believes that a telephone conference with Applicant's attorneys would be advantageous to the disposition of this case, the Examiner is cordially requested to telephone the undersigned.

In the event that the Commissioner of Patents and Trademarks deems additional fees to be due in connection with this application, Applicant's attorney hereby authorizes that such fee be charged to Deposit Account 09-0463, maintained by Applicant's Assignee.

Respectfully submitted,

By:
